Abstract

Noxbox is a blockchain service allowing you to get the service you need in the right place at fair price and at convenient time with a single click.

Noxbox services market is any service that you could ever imagine!

List of the services:

- repair and construction services
- transport services
- cargo transportation
- tire service
- food delivery
- clearing
- laundry
- doctors
- massage
- haircuts
- manicure and pedicure
- gardening services

This is only a short list of services that our team is going to provide.

Present world of services

Nowadays there are many owners of cryptocurrencies, and as a rule they appreciate their time and have a pragmatic mindset and farsightedness. They increasingly notice how much time they spend on such repetitive actions as a haircut, massage, manicure, food delivery, tire service, repair, construction and plumbing services. And the point is not in the time of receiving the service, it should be of high quality and provided in good faith, the point is in the accompanying time consuming.

Let us consider an example of modern haircut service:

- Find the nearest hair salon (5 minutes).

- Make an appointment online or by phone for the time available (1-2 minutes). Sometimes you have to shift your work schedule only because your appointment time is already taken by someone else!

- Spend 10 - 15 minutes on the way to the hair salon.

- Probably wait in a line (0 - 5 minutes).

- The haircut itself should be done in a good and conscientious manner and the time for it can vary, but on average, it takes 45 minutes.

- Pay for the service (by card – 1 minute, in cash – 2 minutes).

- Return to the starting point (10 - 15 minutes).

In total: from 27 to 44 minutes are spent besides the haircut itself. Just one haircut. And if you think about how much time we spend on the way to the massage therapist or a trip to the store, or maybe you have a broken faucet in the bathroom and you need to look for a plumber or to fix it by yourself spending the whole day on it!

The problem is that such things are repetitive. We will have our hair done again, we will go to the masseur again and buy food again and again.

There is a solution that will save your time and money!

Services world of the future. World of Noxbox

At any time which is convenient to you, open the Noxbox application installed on your mobile phone (tablet, PC) and click on the Service Order button (1 minute), the nearest performer with high rating arrives at your place within 5-15 minutes and provides the service on a high-quality level. Payment by cryptocurrency is performed automatically (0 minutes) and the rating is updated (0 minutes).

Service received.

Your time saved from 26 to 43 minutes.

That is the way it is going to work. And this is only one service.

Reference. The approximate cost of the hairdressing services market today is $ 40,000,000 of annual turnover in the world.

Investors privileges

- The company profit will be distributed among token holders once a quarter
- Token holders providing services in the Noxbox application will receive an additional bonus for the service provided
- Token holders receiving services in the Noxbox application will receive a discount on the received service

Expected by analytical centers value of the NBX token in the end of 2018 is 1 USD

Why Noxbox? Our main advantages!

❏ Rating is saved in the blockchain. For example, Consumer requested a service (let's say a haircut) and was dissatisfied, he post a low mark on the Performer, the data is saved in the blockchain. As a result ratings can not be hidden, changed or deleted. The Noxbox platform will be available only to performers and users with higher rating, that will ensure the highest quality of services

❏ Biometric identification of the performers according to the geometry of the face and iris of two eyes. It will be impossible to register user twice and hide quality rating for provided services

❏ Services on demand. The application shows Performers who are available right now, ready to arrive to you within 5-15 minutes. No need to wait for the processing of your request or call from the operator. You get the service instantly

❏ Guaranteed payment. Smart contracts will guarantee the payment for Performer for provided high quality services

❏ Fair price. In the modern world, many services have unfair prices, so you may pay a service price 2-3 times higher than its market value. The Noxbox platform will automatically calculate the price depend on demand and supply. You will always receive the service only at an honest and fair price

❏ World without borders. Users can always continue to receive services while traveling in other countries

❏ Quality assurance. Users of the Noxbox application can be sure that the quality of provided services is always high

First of many services by Noxbox

In this section, you can make certain of honesty of our intentions and test our applications:
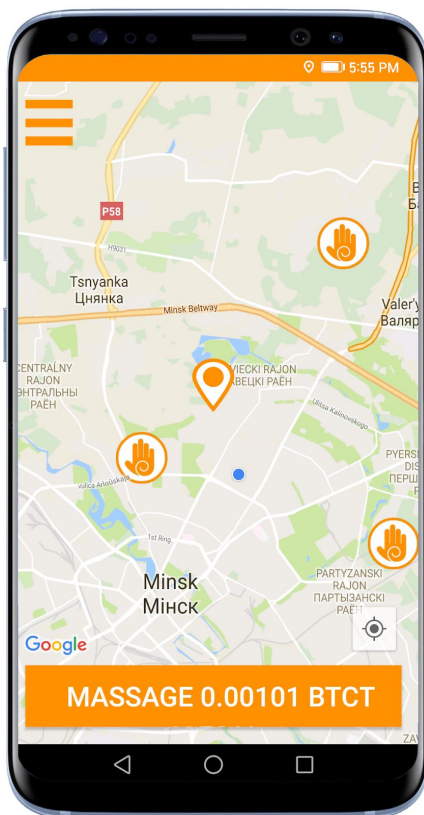

- Mobile application Noxbox Massage for a User who needs massage
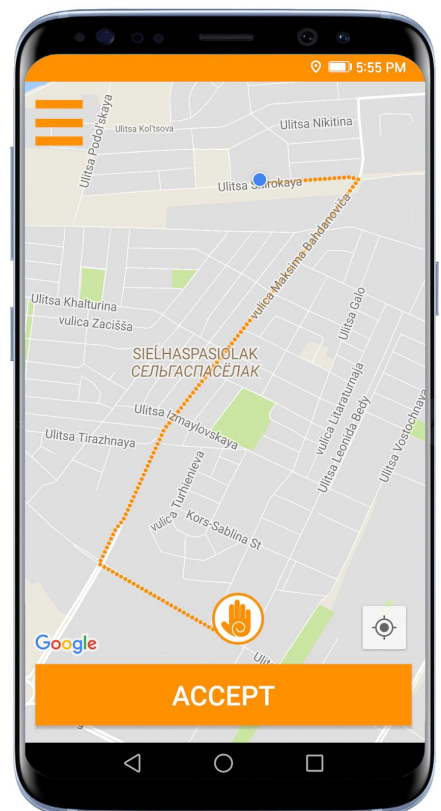

- Mobile application Noxbox Masseur for a Performer who wants to earn bitcoins by doing good massage

- Application cloud logic guarantees payment for Performer's work and high quality of the service performed to the User

- A personal bitcoin wallet is created for each User. During testing test bitcoins are used. Test bitcoins are available after registration on the payment platform block.io
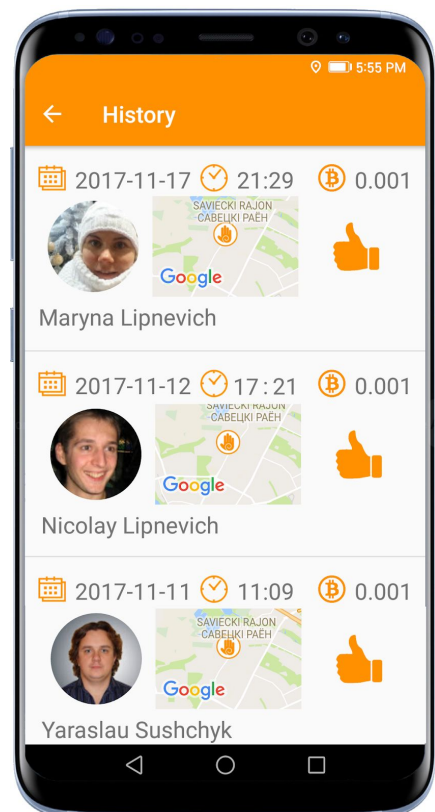

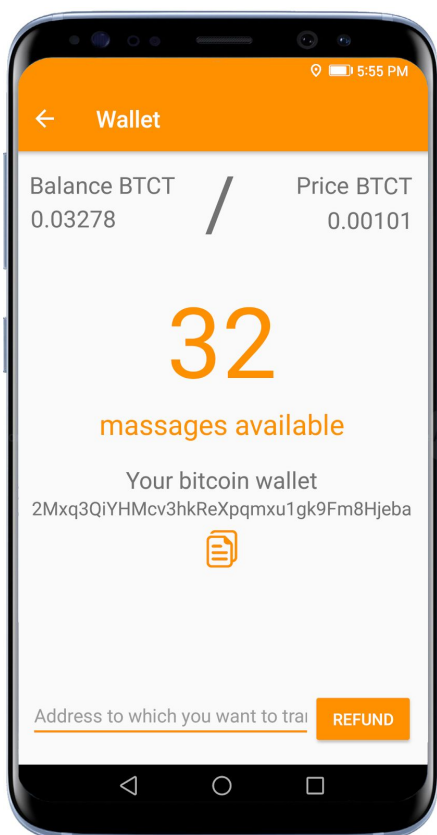

Technical description of application

Authorization according to the selected Google+ account with SmartLock.

Search for the nearest performer with the use of GeoFire technology. To help the Performer to find the way to the User, Google Maps is used that establishes the route with Google Directions.

The rating system and guaranteed payments are implemented in the form of Oracle, the logic of which is automatically scaled in Firebase Functions.

Bugs are tracked by Firebase Crash Report.

With the help of the payment service block.io the wallets are created, payments are made and the balance on the accounts is checked.
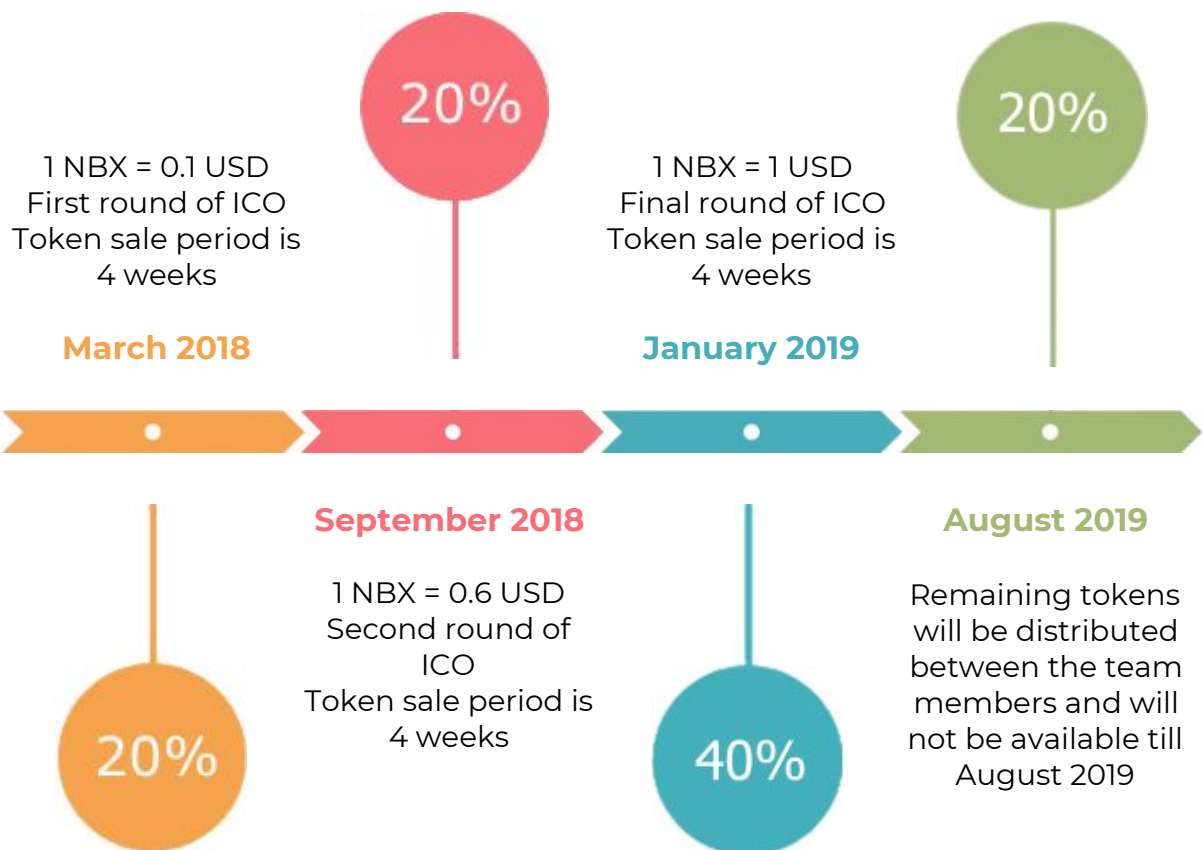

Roadmap

March 2018 - March 2019

- Automatic price calculation depending on demand, supply and region of service provision

- Payments with the Noxbox tokens for faster payments with a low transaction cost

- Logic of payments and ratings is transferred to self-executing smart contracts

- History of the services provided is stored in the Ethereum blockchain

- Refereeing by vote of independent experts

- Biometric identification upon registration of Users and Performers

- Translation into all languages of the world

- Development and launch of 3-4 services

March 2019 - March 2020

- Development and serial launch of a large number of diverse services

Token emission

The only one with no changes

Token name	Noxbox
Token ticker	NBX
Description	World of services in a single click
Purpose	Internal crypto currency of Noxbox applications
Token identifier	GB3uRxpNQDRMxoGMDPT2XBhaXFphU2 BaiQmnBMHXP6ns
Platform	Waves Platform
Amount	200 000 000 NBX
With no possibility of additional emission	True
2018.03 Price	1 NBX = 0.1 USD
2018.09 Price	1 NBX = 0.6 USD
2019.01 Price	1 NBX = 1 USD
Soft cap	1 000 000 USD
Hard cap	4 000 000 USD
Investors protection	**If the minimum cap is not reached, funds are returned**
Exchange for token sales	Waves DEX
Payments	BTC, WAVES, ETH, LTC, ZCASH, USD, EURO

Funds distribution from the sale of NBX tokens
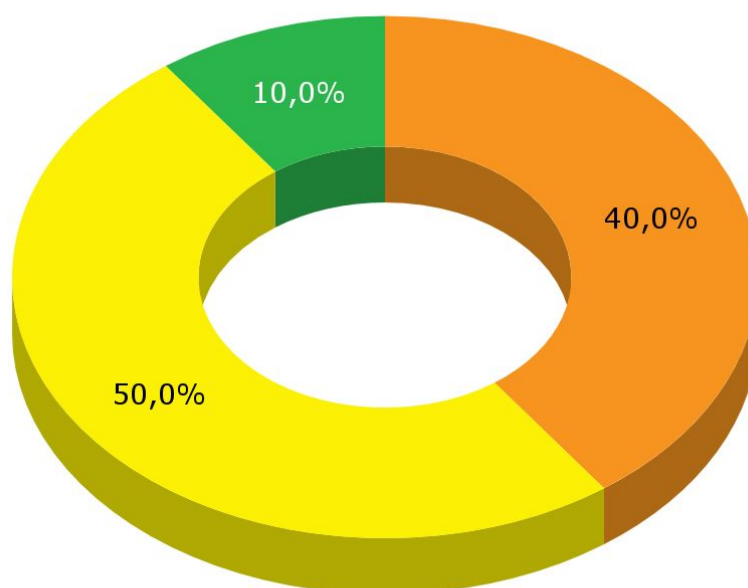

- 🟠 Marketing and promotion
- 🟡 Development implementation
- 🟢 Bonus programs and special offers
